

100Mbps PoE Switch

WK-PS219GF | WK-PS227GF

Overview

The WIKING 100Mbps PoE series switch offers 16/24 100Mbps PoE ports with a maximum PoE budget of 270W. Specific network ports can deliver up to 60W, providing robust power support for high-demand devices. It features 2 gigabit RJ45 ports and 1 gigabit SFP slot for flexible network expansion. Support for VLAN, Extend, and Default modes via a smart DIP switch meets various project needs. The switch automatically detects and identifies PoE-compliant power-receiving devices and provides both power and data transmission through a network cable, simplifying installation and reducing costs—creating a multi-functional and reliable CCTV network solution.

Features

PoE 250m Long-Distance Extension

The DIP switch enables Extend mode, allowing all PoE ports to transmit data and power up to 250 meters. No additional hardware or configuration is required, making it easy to use and cost-effective—perfect for deploying surveillance cameras in large areas.

Smart PoE Watchdog for Automatic Reboot Offline PD

All PoE ports support the PD Alive function, which automatically detects and reboots offline PoE powered devices, ensuring stable network operation.

Port Isolation for Security and Broadcast Storm Prevention

With VLAN mode, all PoE ports can communicate only with uplink ports, preventing data leakage between ports and mitigating broadcast storms that could disrupt the network.

Plug and Play, No Configuration Required

No professional expertise is needed—even non-technical users can easily deploy the network.

Fanless Design for Silent Operation

The fanless design ensures a quiet working environment, making it ideal for offices, hotels, and other noise-sensitive locations.

Button			
DIP Switch*		VLAN Enable VLAN and PD Alive mode. All downlink ports are isolated but can communicate with uplink ports. All PoE ports enable the PD watchdog function to detect and reboot the offline-compliant PoE-powered devices.	
		Extend Enable Extend and PD Alive mode. The transmission distance of port 1-16(WK-PS219GF)/ port 9-24(WK-PS227GF) can be up to 250m, but the rate is limited to 10Mbps. All PoE ports enable the PD watchdog function to detect and reboot the offline-compliant PoE-powered devices.	
PoE/Link LED Switch Button		Default State: The indicator light is green, showing the Link status After Pressing the Button: The indicator light turns yellow, showing the PoE status, which indicates the PoE power status
